LECHUZA® – The Original

TREND COLLECTION

Simplicity and lightness is our philosophy when it comes to materials and working with our planters. But this means much more to us when it comes to you, our customers, because we want to make caring for plants in LECHUZA as simple and convenient as possible with a selection of practical planters and functional accessories.

Look for the LECHUZA logo. Because, even though other planters might look like ours: Only LECHUZA planters – equipped with the original LECHUZA sub-irrigation system developed by specialists – offer you comfort and quality in addition to their extraordinary design for guaranteed magnificent plant growth.

**LECHUZA
is Spanish
for “owl”**

The LECHUZA sub-irrigation system watches over your plants like a wise and watchful owl, ensuring that they always receive the care they need for optimum growth.

The unique advantages of LECHUZA planters

- **Plants grow better** thanks to a balanced supply of water to the roots.
- **Water less often.** Plants receive the water they need from the reservoir.
- **Changing plantings is easy.** The removable plant liners can be exchanged on the spot and easily moved for space-saving winter storage (available for nearly all models).
- **Mobile even when planted:** Thanks to the coaster, it's easy to move even large planters.
- **Quality** made in Germany to the highest production standards.

Balanced water supply

Ideal for home and garden

What makes LECHUZA planters different? Everything.

1. Water less often
2. Changing plantings is easy
3. Plants grow better
4. Mobile even when planted
5. A plant system for home and garden
6. Large selection

Clever watering with LECHUZA

The watering phase is critical:

After you first plant your plants, you should always water them from above onto the pellets and make sure any water collects in the water reservoir. Fill the water reservoir for the first time after 12 weeks (number of weeks may vary depending on the planter size).

Helps prevent watering errors

Simply refill the water reservoir when the water level indicator reads "Minimum".

Controls the water supply

It doesn't matter if your plants require a little or a lot of water: LECHUZA-PON regulates the supply of water to the roots and ensures optimum aeration.

Constant supply of water

The LECHUZA watering system provides a balanced supply of water to the roots for magnificent plant growth.

LECHUZA – optimum growth

LECHUZA doesn't just look great. LECHUZA also really works. But how?

The LECHUZA plant system cares for your plants just as nature intended. The only thing that you need to provide is your plant of choice and the right potting soil. But don't worry, you don't need expensive plants or substrates.

LECHUZA-PON plant substrate is the perfect alternative if you don't want to use organic potting soil. It offers you the following advantages:

- supports root aeration
- perfectly controls the water supply
- stores added nutrients that are then released to the plant as needed
- maintains its structural stability (unlike soil) and doesn't settle or decompose
- consists of pumice, volcanic rock and zeolite and also includes a slow-release fertilizer, which is effective for 6 – 12 months

TERRAPON is the new plant substrate from LECHUZA with humus.

LECHUZA-TERRAPON can be used to plant nearly all house, balcony and garden plants with the exception of bog garden plants and orchids.

NEW!

TRIO Cottage 40 – Dipladenia

TRIO Cottage 30, 40 – Dipladenia

The perfect addition:
TRIO trellis
and TRIO pedestal.

TRIO Cottage

TRIO pedestal
The optional TRIO pedestals are the perfect addition.

CUBE Cottage 40 – Liriope muscari

CUBE Cottage 40 – Imperata cylindrica

Switched yet?
 The CUBE 40 plant liner also fits in same-size CUBICO and TRIO planters

CUBE Cottage

The new CUBE Cottage planter features the popular wicker look in a real cube shape with equally long sides. CUBE Cottage is ideal for plants with a large root volume.

Model	W x D x H	Plant volume
CUBE Cottage 40	40 x 40 x 40 cm	approx. 31 liters
CUBE Cottage 50	50 x 50 x 50 cm	approx. 61 liters

Included in the All-in-One Set: Interchangeable plant liner (patented) with recessed carrying handles and the LECHUZA sub-irrigation set.

Our tip: The CUBE 40 plant liner also fits in CUBICO 40 and TRIO 40 planters.

BALCONERA offers you the following advantages:

- easy-to-remove interchangeable plant liner
- winterproof finish
- large water reservoir (3 / 5 liters)

BALCONERA Cottage

The balcony planter from LECHUZA brings balcony dreams to life: Conveniently plant the liners on the ground or a potting table. Attach BALCONERA to railings or walls and place the potted liners into the planter. That's it!

Model	W x D x H	Plant volume
BALCONERA Cottage 50	50 x 19 x 19 cm	approx. 8 liters
BALCONERA Cottage 80	79 x 19 x 19 cm	approx. 12 liters

Included in the All-in-One Set: Plant liner with LECHUZA sub-irrigation system (BALCONERA 50 comes with one plant liner; BALCONERA 80 comes with two).
