Risparmio energetico e riduzione delle emissioni CO₂

Energy saving and reduced CO₂ emissions

Abbiamo attuato piani di orientamento per migliorare l'efficienza energetica, attraverso la riorganizzazione dei reparti dei diversi stabilimenti, per ottenere il massimo rendimento dalla luce naturale fino alla decisione più importante di installare un grande impianto fotovoltaico e macchine ad iniezione a basso consumo energetico.

We have implemented energy saving plans by reorganising the various factory departments to obtain the maximum intake of natural light till the most important decision to install a large-scale photovoltaic plant and energy saving injection machinery.

Wir haben Pläne zur Steigerung der Energieeffizienz durch eine Reorganisation der Abteilungen der verschiedenen Standorte umgesetzt, um die maximale Effizienz aus dem natürlichen Licht zu erlangen, bis zur letztendlichen Entscheidung eine Solaranlage und Spritzgießmaschinen mit geringem Stromverbrauch zu installieren.

Hemos puesto en marcha planes para mejorar la orientación de la eficiencia energética, desde la reorganización de los departamentos de nuestras distintas plantas para obtener el máximo rendimiento de la luz natural hasta la decisión más importante de instalar un gran sistema fotovoltaico y máquinas de moldeo por inyección con bajo consumo de energía.

Logistica ottimizzata

Improved logistics

Da sempre poniamo il massimo impegno a contenere gli sprechi di volume. Disporre più pezzi per unità d'imballo e ottimizzare la movimentazione esterna ed interna delle merci, contribuisce a contenere inquinamento atmosferico che i mezzi di trasporto causano.

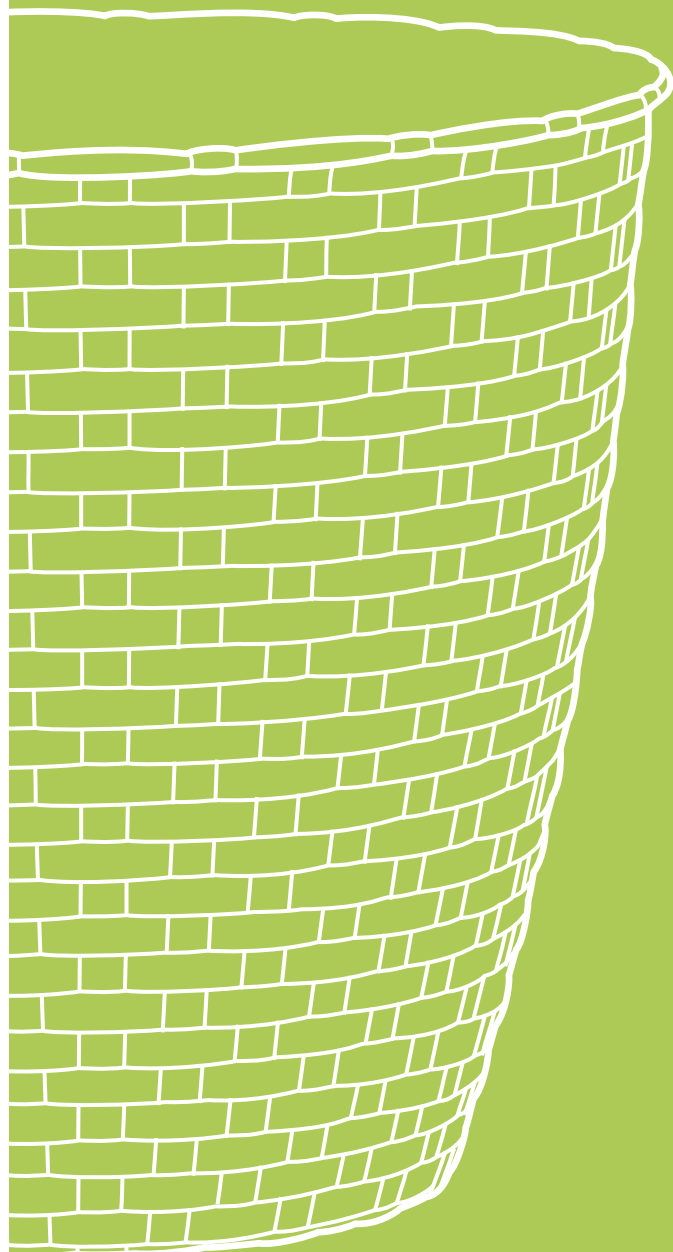

We have always been committed to reducing waste: placing as many pieces as possible in a single packaging, more efficient internal and external goods handling, all help to reduce air pollution caused by the means of transport.

Nous nous engageons depuis toujours à limiter les encombrements. Le regroupement de plusieurs pièces par unité d'emballage, l'optimisation de la manutention des marchandises à l'intérieur et à l'extérieur de l'établissement facilitent la réduction de la pollution atmosphérique provoquée par les moyens de transport.

Schon immer legte Stefanplast ein besonderes Augenmerk darauf, Umweltbelastungen durch eine optimale Volumenverteilung, Stapelung und Materialbewegung auf ein Minimum zu reduzieren.

Siempre nos esforzamos en contener la pérdida de volumen, poniendo más piezas por unidad de embalaje y optimizando el manejo interior y exterior de los productos ayudando a reducir la contaminación que los medios de transporte causan.

Linea Venezia

The Venezia Line

Con più di 30 referenze la Linea Venezia ben rappresenta la “filosofia” della produzione Stefanplast. In particolare la fioriera Venezia, con o senza alzata, si presta particolarmente agli spazi aperti, come terrazze, balconi o situazioni che richiedano di essere delimitate in modo gradevole. Proposta in versione rettangolare e quadrata, può essere utilizzata anche senza alzata, in abbinamento con i sottovasi.

With more than thirty references, the Venezia Line really represents the philosophy of Stefanplast production.
